

Live Studio HD/SD

This is where it gets really exciting for all you TV professionals: three brand new studios in the heart of Fitzrovia. They're all live, they all offer HD and satellite distribution, and they all have global fibre connectivity. We probably shouldn't say this, but we're going to anyway. Our studios are one of the very best things about **Mena Media**. They're just so grown-up and professional.

They're so professional in fact that you could very easily imagine yourself in the BBC News 24 Studio. And here's the

difference that makes the difference. We've got an HD camera streaming live from Westminster, the very heart of democracy, onto the back wall of the studio. It looks as though you're sitting in a studio with Westminster - Houses of Parliament, Big Ben and all - as the backdrop. How many other studios offer you this level of service and sophistication?

This is what you get from **Mena Media**; visit www.menamediauk.com for more.
